

Numerical Recipes Miscellaneous Files

This page gives access to some miscellaneous files that are used by the Example programs as data. These files are not necessary for using any of the Recipes in your own programming projects. Scroll down this page and click the left mouse button on any particular file that you want to **view**, **print**, or **save to disk**. (Note: Be sure to initialize your path with the Set Path button before you save any files to disk.)

If you plan to try out a significant number of the Example programs, you might want to copy all of these files to a convenient directory. Here is how:

1. Set your path using the Set Path button on the button bar.
2. Click here: [Copy all Miscellaneous Files to Disk](#)

[DATES.DAT](#)
[FNCVAL.DAT](#)
[MATRX1.DAT](#)
[MATRX2.DAT](#)
[MATRX3.DAT](#)
[NR2DP.DAT](#)
[SPCTRL.DAT](#)
[TABLE.DAT](#)
[TABLE2.DAT](#)
[TARRAY.DAT](#)
[TEXT.DAT](#)
